Hi, I'am contacting you in regards to ANILCA title 810 and 811 our subsistence use to lands will be lost north of donlin site in the Iditarod area, unless another route is established for subsistence users due to the mine site being on our existing trail.

Total closure to such subsistence opportunities would not benefit our people with bison potentially being on the list in the near future along with traditional caribou and moose hunting and trapping grounds due to the fact that they will be impossible to access.

Thank You
Tim Z.
