RE: Donlin Gold Draft EIS

To Whom it May Concern:

I am sending this in support of the Donlin Gold Project. This project is an exciting opportunity for the residents of Alaska and the residents in the local area of the Project. It will provide numerous benefits to the State, the Region, the economy, the Alaska Natives and importantly, improved transportation and communication infrastructure in support of the mine, including ports, possibly pipeline facilities, and can provide better services and lower cost of energy, goods and services to the local residents in the area.

Derek Betts, Alaska resident
