

- Dowlin Gold - status?

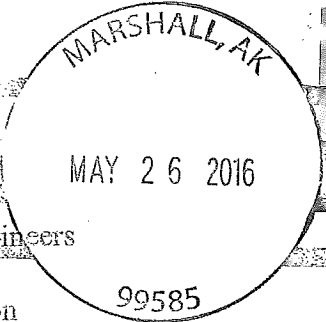

5/26/16

"As a former employee, I do reckon that Economic development in our Region is very important. in the area, where in our small villages Jobs are so limited, that people rely on subsistence,

As we can see due to Chum Salmon crash in the late 1980's, also we are facing today small numbers of King Salmon on the Yukon, that it is true our subsistence resources are in the mercy due to climate change or over fishing. In the past 1700's - 1800's, there once was this sort of situation many faced starvation, I will restate what my Great Great Grandma said to my dad. who is a school teacher today, that Education is important, that Jobs are our safety net,

If all subsistence resources are depleted, Education is a safety net if our subsistence resources don't comply to our needs. We do need professional Economic development in our small villages. Such as Dowlin Gold, Job look forward, such as this venture gives hope to our young people today. Education is a must, because you cannot pay bills with subsistence.
