Dear Sir, By way of introduction my name is Billy Lang I am a Veteran of the United States Army National Guards. I read the article in the Alaska Dispatch News about Donlin gold mine, I currently hold (3) Water treatment and (3) Wastewater certifications from California State University. It is my aim in the next (2) years to complete Industrial Wastewater Treatment I & II in California. I would like to know which Wastewater treatment system will be used to operate The Donlin mines, Any available information you can send me will be greatly appreciated. Thank-you in advance.

Sincerely,  
Billy Lang
