Subject: [EXTERNAL] DEIS for Donlin Gold Project
Date: Tuesday, April 26, 2016 8:34:11 AM

To Whom It May Concern:

On behalf of 600 Alaskan companies and their 30,000 employees, I am writing to encourage you to choose Alternative 2 from the DEIS for the Donlin Gold Project.

- The social and economic benefits of this project to the region, state, and to the nation;
 - Through ANCSA 7(i) and 7(j) revenue sharing provisions, the Donlin Gold project will provide revenue to all Alaska Native regional and village corporations.
 - The jobs and the economic stimulus provided by Donlin Gold would help sustain communities in the YK region and fund traditional subsistence activities.
 - Rural Alaska is being impacted most by the reduction of state and federal dollars. Alternative 1 (the no project alternative) will likely have a negative impact on the YK region.
- The potential for lower cost energy options to the region such as the proposed natural gas pipeline which will have excess capacity should there be an interest in accessing natural gas to address the energy needs of the YK region.
- Job opportunities which will likely lead to reduced out-migration, helping to maintain rural schools and culture, including traditional ways of life.
- The Donlin Gold project could produce gold for 27.5 years, while providing well-paying jobs in a region where few other opportunities exist.
- The State of Alaska Department of Natural Resources enforces stringent regulations overseeing mining activities statewide that effectively protect the environment, wildlife, and human health.
- New mining operations in the area, should they come to fruition, can be of great economic benefit to Alaska and local communities, as well as Alaska Native corporations and shareholders.
- This project will likely provide responsible economic prospects for this region and for Alaska, while protecting the subsistence resources.
- The proposed pipeline in Alternative 2 is designed to minimize impacts on the Iditarod National Historic Trail. There would be insignificant impacts to the trail and no impacts to the Iditarod Sled Dog race.
- Construction of the gas pipeline would be sensitive to the timing of the Iditarod and Iron Dog races as well as hunting season.
- The EIS process gives Alaskans and other stakeholders adequate time to fully review the project documents, and to provide input on the plans.
- The project will offer long-term opportunities for rural Alaskans to develop skills and to enable them to not only continue living in rural Alaska, but to prosper.
- An estimated 3,000 jobs will be created during the approximate four-year construction phase, and between 600 to 1,200 jobs for the estimated mine life of 27.5 years. These jobs will have a significant and positive impact on the economy of the region and the state.

- Donlin Gold's project description demonstrates an understanding of environmental concerns, and features vigorous environmental management principles.
- Alaska's existing mines are operating to the highest standards and in harmony with our renewable resources.

Thank you for your consideration -
