

TO WHOM IT MAY CONCERN:
U.S. ARMY CORPS OF ENGINEERS:

I would like to comment what & why this project is important to me & also the people of Western Alaska.

This project is providing jobs for the people. Due to lack of jobs in the villages, people here in Western Alaska are struggling to get by; food, gasoline, stove oil are just a few of the economic problems here. Down Gold provides jobs for people in which they can pay for bills & provide for their families. This will ~~also~~ hopefully put an end to all the suicides that's been happening. Struggling with money, paying bills, no jobs, puts a lot of people into depression, causing suicides as the only answer to ending problems.

These young adults that did not proceed with their education would be able to learn a trade at Down Gold. They would be able to work & take time off for subsistence. The opening of Down Gold would provide thousands of jobs for the

people of ALASKA. THIS IS MY
comment for the US. Corps. of
Engineers. THANK YOU FOR YOUR TIME.
