

The public comment period on the Donlin Gold project has been extended.
Use this postcard to comment.

Please send your postcard to the U.S. Army Corps of Engineers with postmark before the **May 31, 2016** deadline.

I think that the Donlin Gold Project would benefit the people of the CALISTA and the Yukon/Kashoekwim region, as long as our rivers do not get polluted from the waste by products from the mine. I think that the Donlin Gold Mine, as well as the owners do not pollute the land and take extreme measures to make sure that all pollutants will be contained and not leak into the rivers and the land we do subsistence on. Food from the land and rivers sustain us and that is why we take care of it. Stores are too expensive, so we supplement our foods by subsistence. The jobs generated by Donlin will help the economy in the Y-K Delta.

Thank you,

Albert Smith
