To The Corp -

Thank you for extending the comments deadline. I live in a historic gold mining town and I am generally a very enthusiastic supporter of the mine. Doulin has done an exemplary job of communicating their proposals and have been generous in their support of good causes. My only issues with the project center on the gas lines route through the historic Faded Trail. Though Doulin has sort of minimized the impact, this will still be very intrusive to a fragile wilderness and will not so subtly change the character of the race and the whole untouched nature of that portion of the trail. I have

traveled on the trail and ex-
cept for Talin Trailhead, Remy
Pass Lodge and a handful of road
houses along the trail it is a
pure wilderness, pretty much untouched
by the hand of man. I would
really like to see Donlin address
this issue. Thank you for
your attention.
